The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art in view of Ji et al 6558183.

The admitted prior art substantially discloses the claimed invention, including a control adapter having a connector, a transmission unit (circuit board) and an engagement mechanism for engaging the control unit. The admitted prior art, however, does not disclose a case main body. Ji et al discloses a case main body 11,12, and to provide the admitted prior art with a case main body thus would have been obvious, to protect the connector, transmission unit and engagement mechanism.

Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art in view of Ji et al as applied to claim 1 above, and further in view of Endo et al 5639256.

The admitted prior art as modified by Ji et al substantially discloses the claimed invention except for the specifics of the engagement mechanism. Endo et al discloses engagement member 12 having a press-maneuver part 15 and an engagement claw 14, shaft 16, and urging member (torsion spring 17) which biases the press-maneuver part. It would have been obvious to form the engagement mechanism of the admitted prior art as taught by Endo et al for better attachment to the control unit.

Applicant's arguments filed April 15, 2005 have been fully considered but they are not persuasive. Ji et al clearly teaches the obviousness of providing a case main body for the admitted prior art.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

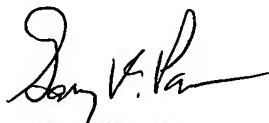

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary F. Paumen whose telephone number is 571-272-2013. The examiner can normally be reached on Monday-Thursday.
